

I made a
KNIFE!

THE MAD CLEAVER

MINI CLEAVER

CONVEX GRIND

NOTES: the grind should be blunter than normal, roughly 25°. Don't sharpen the edge to knife sharp, it will be too thin. Swing with lots of momentum. The more weight your cleaver has (ie. the more metal you leave on), the better it will perform. That said, the mini-cleaver does not function like a true cleaver—it's more for show.

KNIFE FACT #987: The scene in Skyfall where Daniel Craig is shaved with a classical razor led to a 400% increase of straight edge razor sales.
